

We are seeking an **Industrial Millwright** to join our team!

About us

A.B.M. Tool & Die Co. Ltd. is at the forefront of modern technology in the design and manufacture of stamped metal parts, automated and welded assemblies. Since the founding of our company in 1969, A.B.M. Tool and Die has consistently provided unmatched quality, competitive pricing, on-time delivery, and uncompromising customer service.

We have 3 locations to support your business including:

* 100,000 sq. ft. Manufacturing Facility in Brampton, ON, Canada * 20,000 sq. ft. New Tool Build Facility in Mississauga, ON, Canada * 100,000 sq. ft. Manufacturing Facility in San Luis Potosi, SLP, Mexico

What we offer

Competitive Wages, Benefits package (extended health, dental and vision), RRSP Matching, Continuous training, and professional development, Tuition reimbursement

Requirements and Qualifications

- Red Seal trade certification required.
- Extensive experience with stamping, presses, welding, and assembly equipment including hydraulics, pneumatics, and PLC controls.
- A complete understanding of the preventive maintenance required on production weld and tool room equipment.
- Knowledge of fabricating equipment and processes.
- Ability to read and interpret drawings, blueprints, schematics, and electrical code specifications.
- Ability to troubleshoot.
- Well, developed analytical skills.
- Ability to multi-task and work in a fast-paced environment.
- Comprehensive understanding of lockout/tag out procedures and legislative obligations and requirements.
- Excellent communication and interpersonal skills.
- Excellent English skills both oral and written.

Job Responsibilities

- Install, align, dismantle, and move stationary industrial machinery and mechanical equipment such as pumps, fans, tanks, conveyors, and generators according to layout plans using hand and

power tools.

- Sustain the Preventive Maintenance schedule on all production and tool room equipment including unscheduled repairs.
- Check all press oil levels, replenish as required and log amount of oil replenishment.
- Read and interpret drawings, blueprints, schematics, and electrical code specifications to determine layout of industrial electrical equipment installations.
- Inspect and examine machinery and equipment to detect and investigate irregularities and malfunctions, to adjust machinery, and to repair and replace defective parts.
- Install, troubleshoot, and maintain power transmission, vacuum, hydraulic and pneumatic systems, and programmable logic controls. Carry out preventative maintenance program and ensure maintenance records are kept up-to-date and accurate at all times.
- Maintain an inventory of spare parts and fluids required to keep Maintenance program running.
- Limited to Install, examine, replace, and repair electrical wiring, receptacles, switch boxes, conduits, feeders, fibre optic and coaxial cable assemblies, lighting fixtures and other electrical components (revise items listed to fit A.B.M.).
- Inspect and verify that all equipment and safety devices are in proper and safe operating condition.
- Fabricating for the Press Shop and Tool Room
- Uses machine tools such as lathes and milling machines and fabrication tools such as welders, breaks, presses, power tools and punches.
- Basic Operation of machine tools, such as drills and grinders, to fabricate parts required during overhaul, maintenance and set up of machinery.
- Ensure and maintain a tidy and organized workspace.
- Adhere to all obligations and requirements under Section 28 of the Occupational Health and Safety Act.
- Attend and participate in all required meetings and ensure the timely communication of information to all other team members.
- Maintain strict confidentiality regarding all company tooling, processes, methods, customer and supplier information and business.
- Keep abreast of, informing management of new technologies and methods.
- Perform other duties as required by Department Manager or General Manager. Maintain a clean, organized and safe work environment using common sense practice and the standards and principles of the 5S system.
- Adhere to 5S principles, IATF 16949 standard and all company policies and procedures.
